

AUTOMATION

Automation or automatic control, is the use of various control systems for operating equipment The biggest benefit of automation is that it saves labour; however, it is also used to save energy and materials and to improve quality, accuracy and precision. (Wikipedia)

Imagine a home, boat or business that remembers to lock itself at night.

Blinds that close, as the sun hits the windows.

A conference or home theatre that takes care of the lights, sound and picture at the touch of a button.

Automatic gates and barrier systems that give property managers and occupiers complete control over entry and exit to residential, industrial and commercial properties.

With an automation system, everything works together the way you want it to, integrating different technologies from different manufacturers.

GB Integrated Systems Ltd. design, supply and install automation systems for any environment to suit your requirements and budget.
