

DATA

GB Integrated Systems' will design your entire cabling system, handle the logistics, project manage the installation and maintain the system throughout its lifetime.

We provide a planned cabling infrastructure within your building that will interconnect with all devices that communicate with your network environment.

GB Integrated Systems Ltd. can install cabling systems within any property, from offices and commercial premises to sports and educational facilities. Whether you are a small office or a large organisation requiring a full structured cabling system, we will design a system to suit your requirements and budget.

Our systems support the latest data, voice and video applications guaranteed to the latest industry standards.

- **STRUCTURED CABLING**
- **FIBRE OPTIC**
